

'Proud to be the sole distributor of Rottgers Ketten Pump Lifting Chain in the UK and Republic of Ireland'

Stainless Steel Pump Lifting Chain – Grade 60 Specification

- Manufactured to the highest standard by Rottgers Ketten GmbH - Germany.
- Fully compliant with the latest [LEEA](#) specifications for submersible pump lifting chain.
- All chain is supplied with the required EC Declaration of Conformity/manufacture's certificate and safe use instructions.
- Total traceability of all components used in the manufacturing process.
- Chains are manufactured from high quality 316L stainless steel (1.4404) and duplex stainless steel (1.4462) ensuring maximum corrosion resistance.
- Chains have a surface blasted, uniform smooth finish.
- 630kg, 1250kg and 2000kg WLL chains are available immediately from our UK stock, with other sizes available on short lead times if required.
- All Grade 60 pump chains can be supplied with a ['Written Scheme of Examination'](#) of up to 5 years, as required by many of the water utilities within the UK. This conforms to the strict standards as detailed within the latest LEEA guidance.

Grade 60 WLL (kg)	Chain Link Dimensions Wire d x Internal Width (mm)	Master Link Dimensions Wire D1 x Length D2 x Width D3 (mm)	Weight (kg/m)	STOCK AVAILABILITY
400	4 x 12	6 x 60 x 35	0.35	Production Only
